

P.S. The correspondences between your circuits and the Cabalistic sephira is given sort of ex cathedra in the enclosed.

I have justifications for the correspondences in a part of Game of Life that Chip hasn't typed yet.

It is worth wondering why the Cabalists give 3 sephiroth to the 8th circuit and 1 sephira to each of the other 7 circuits. Any link with Gurdjieff's mysterious 3 laws on that level? Or the tri-une godhead archetype?

I suppose you are moderately scandalized at times by my relapses into occult terminology. Well, it's the jargon that the readers of certain magazines already understand somewhat, and it is a poetic hint of certain phenomena that I haven't yet translated into Learyan, Siragian or Lillyan. My ultimate goal, like yours, is the most operational Einsteinian language possible.

The 12 old man in Finnegans Wake have some correspondence with the 12 terrestrial slots but I haven't worked that out yet...

Berne's criss-crosses only cover circuits II to IV, which he calls Child, Adult, Parent. You know his diagrams:

is parent-to-parent

being answered parent-to-child. Etc. In advanced exo-psychology, one will be showing similar criss-~~XXXXXXXX~~ crosses on 8 levels...

S.M.I?²L.E.,

Bob
