OFFICE OF THE PRESIDENT

ROBERT ANTOON WILSON
2510 College
Berkeley, Calif. 94704

Dear Joanna,

Enclosures are for Timothy.

I've lost my father, my brother and a wonderful dog named Fang the Incurable in the last few years. The line in ILLUMINATUS Vol I -- "mourning never ends" -- is true, but so is the line in Vol II -- "surprise is endless."

Losing loved ones is a wound but if one retains the capacity to love, surprise is indeed endless.

Jimmy Carter may be One of Us.

He's "born again," which can mean anything from brainwashing to Sixth Circuit metaprogramming. He looks more like 6th circuit.

He studied nuclear physics at Annapolis, which Bucky Fuller says gives the only comprehensive science programs in the country, to avoid specialization.

He did post-graduate physics work.

And he saw a UFO once and is fascinated by that subject.

A partial mutant at least.

SMILE,

Bob W
